- Blueprint Course Feature Flag

“Can’t we just see all departmental LO assessment results and see it in a report - aggregated from Canvas and Insights Planned Assessments!”

Flexible Assessment:

What is it?

Coordinators can now gather ALL outcome and standard assessment data, departmentally, using our Flexible Assessment option in the Assessment Plan tool. All data can be viewed on the DASHBOARDS page to Coordinators in Insights.

Flexible Assessment:

Flexible Assessment:

“Why are we only able to sync CSLOs in our Canvas Courses?”

PSLO, ISLO, and Standards Sync (Feature Flag):

What is it?

Coordinators can now elect to “sync” PSLOs, ISLOs, GELOs & Standards mapped to courses! This is done directly on the Mapping page!

PSLO/ISLO/Standard Sync:

The image shows a 'Mapping Details' dialog box with a close button (X) in the top right corner. The main content area displays a mapping from 'ACCT110' to 'English A.A. - PLO1', indicated by a right-pointing arrow. Below this, there is a section titled 'Select an Attainment Level for this Mapping' with an information icon (i) and a dropdown menu. The next section is 'Badging', which includes a checkbox labeled 'Reward Badge at this Mapping?'. Following this is the 'Mapping Sync Settings' section, which contains a checkbox labeled 'Auto-sync PLO to new Canvas instances of ACCT110'. Below the checkbox is a text box that reads '> 0 other ILOs/PLOs are auto-synced to ACCT110'. A red oval is drawn around the 'Mapping Sync Settings' section. At the bottom of the dialog, there are three buttons: 'Cancel', 'Delete Mapping' (in red), and 'Save Mapping' (in blue).

“We have Instructional Designers who create all course content in Blueprints. How can we align outcomes if they aren’t pushed into Blueprints?”

Blueprint Course (Feature Flag):

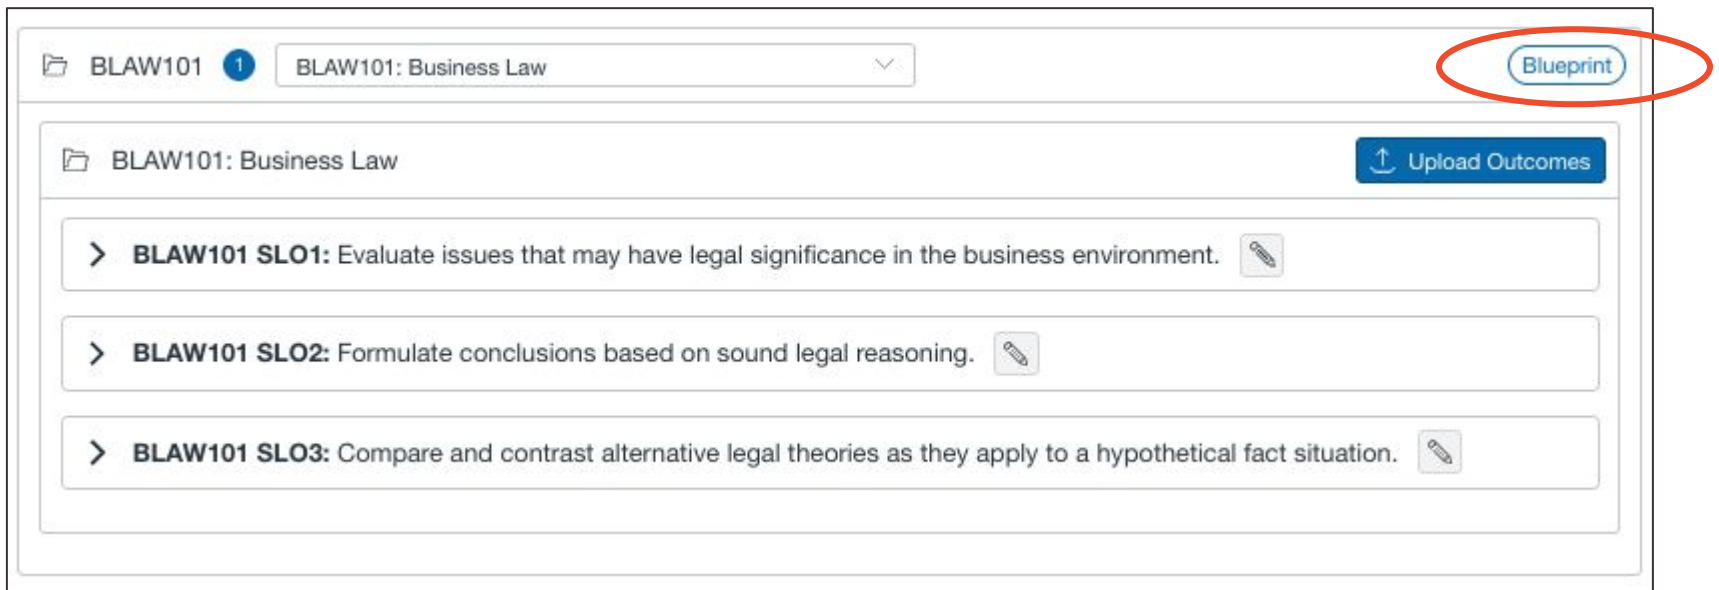

What is it?

For those institutions who use Instructional Designers to create all course content, assessments, and alignments in a “Blueprint” shell - then content is copied into the Canvas Course Offerings taught by faculty. You can now sync CSLOs, PSLOs, ISLOs, and Standards into Blueprint Labeled courses in Canvas.

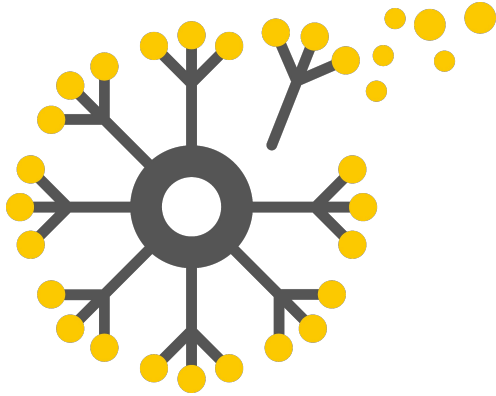

Blueprint Course:

Courses that have a blueprint association in Canvas will show up on your Outcomes page in Insights looking like this:

The screenshot displays the Canvas Insights Outcomes page for the course BLAW101: Business Law. At the top, the course name is shown in a dropdown menu, and a blue circle with the number '1' indicates one outcome is associated with a blueprint. In the top right corner, a blue button labeled 'Blueprint' is circled in red. Below the course name, there is a section titled 'BLAW101: Business Law' with an 'Upload Outcomes' button. The main content area lists three outcomes, each with a right-pointing chevron and a pencil icon for editing:

- > **BLAW101 SLO1:** Evaluate issues that may have legal significance in the business environment.
- > **BLAW101 SLO2:** Formulate conclusions based on sound legal reasoning.
- > **BLAW101 SLO3:** Compare and contrast alternative legal theories as they apply to a hypothetical fact situation.

“Wait.... I just updated the descriptions on my rating scale and now I have to manually and one by one inherit the new descriptions? Why don’t they just update??”

BULK Rating Scale Update:

What is it?

Changes to mapped mastery rating scale descriptions can now be auto-applied downstream to any outcomes with a rating scale association to that mastery rating scale. It effectively 'auto-cascades' descriptions to all outcome rating scales, if they exist (ie, those descriptions will replace existing outcome descriptions).

Bulk Rating Scale Update:

After you adjust the description sets of your Approved Rating Scales, you can click a button to apply those changes to ALL associated outcomes:

Rating Scales

[+ Create Custom Scale](#)

***Institutional Default:** If a Canvas course being assessed does not contain course-level outcomes, this scale will be used to build your outcome and assignment rubric in Canvas.

***Canvas Default:** If an outcome to be assessed has no mastery-rating scale association (its Canvas rating scale has not been aligned to a custom scale on the Outcomes page), its corresponding Canvas Default Scale will be applied upon Canvas assignment creation, ensuring all assessment results are associated to Institutional mastery levels.

Total Points: 5

Bulk Rating Scale Update:

After you adjust the description sets of your Approved Rating Scales, you can click a button to apply those changes to ALL associated outcomes:

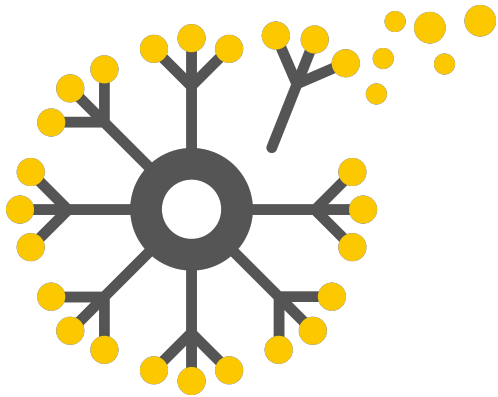

A screenshot of a confirmation dialog box. The dialog has a title bar with a close button (X) in the top right corner. The main content area contains the text: "Are you sure you want to update the rating level descriptions for all outcomes associated to this rating scale?". At the bottom right, there are two buttons: "No" and "Yes". The "Yes" button is circled in red, indicating it is the recommended action.

Confirmation

Are you sure you want to update the rating level descriptions for all outcomes associated to this rating scale?

No Yes
