

Ice Breaker Activity

A decorative graphic on the left side of the slide. It features a central image of a modern glass skyscraper, viewed from a low angle looking up. This image is framed by two concentric circles: an inner yellow one and an outer orange one. Surrounding these circles are several other orange and yellow circles of varying sizes, some of which are partially cut off by the edges of the slide.

Insights Fall Lunch & Learn

September 4, 2024

Agenda

- Icebreaker
- Insights Terms
- Assessment Plan Templates
- CLOs in External Assessments
- Ticketing for Insights
- How to Schedule Time with Erin
- Questions/Conclusion

New Features to Demo

**Insights
Terms**

**Assessment
Plans and
Templates**

**CLO
Assessment
of non-
academic
departments**

Insights Terms Management

What is it?

To enable coordinators to do long range planning of cycles and to consolidate management of Canvas Terms, we added the ability to add terms that are not yet set up in Canvas and group existing Canvas Terms into Insights Terms buckets. When a new Insights Term is created, Canvas Terms with matching date ranges will be automatically associated to it.

Assessment Plan Templates

What is it?

Coordinators can become more efficient with the ability to create assessment plan templates, with defined sections. Sections add another element of organization and governance. Each section can have one or more defined measures, which include Canvas Assessment, External Assessment, Qualitative Measure, and Embedded Dashboards.

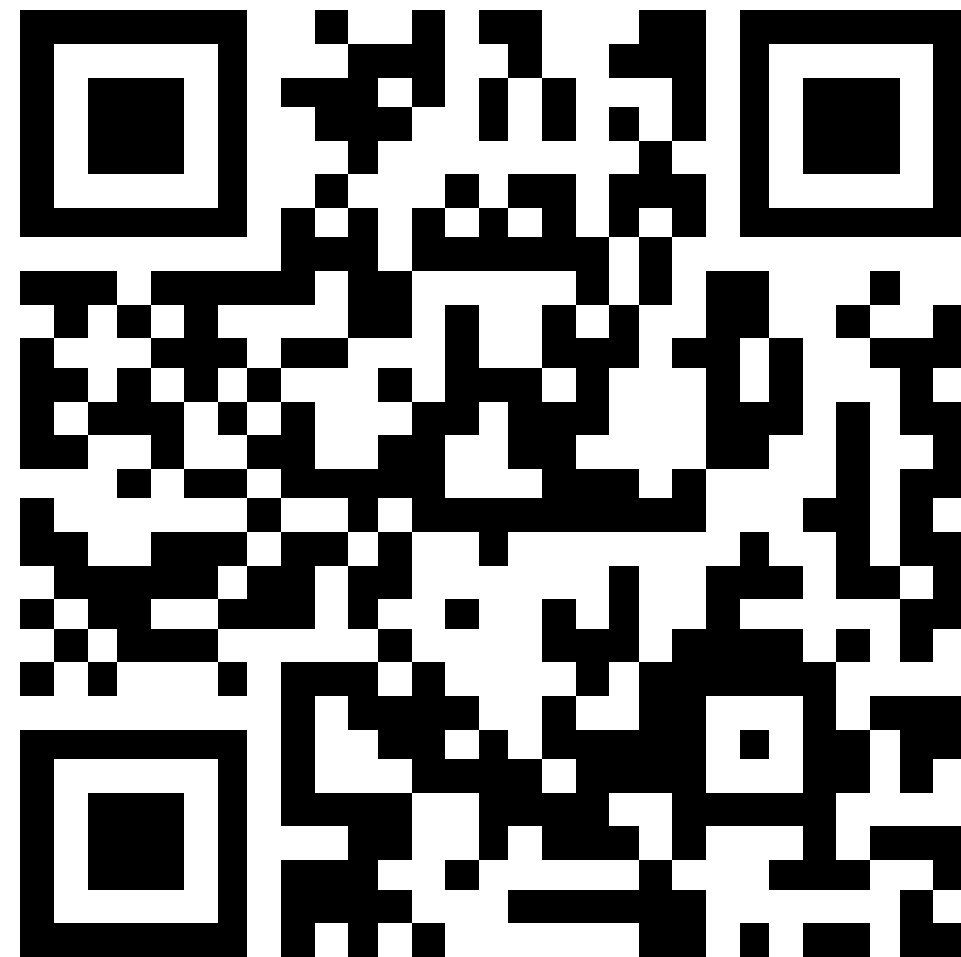

CLOs in External Assessments

What is it?

Coordinators can now upload CLOs to external assessment contexts. This allows coordinators to upload separate outcomes for course components that might not be listed or available in Canvas, such as Student Services assessments.

Quick Poll

Ticketing through HubSpot

Percieved Bugs

Ticket Items

Illogical Functionality

HubSpot ticketing can be found on the same page as our Knowledge Base - it is the preferred method of keeping track of requests, issues, and lapses in functionality so we can swiftly aid in its resolution and follow up as needed.
